Clinical laboratory testing plays a crucial role in the detection, diagnosis and treatment of disease in patients. It's estimated that 60 to 70 percent of all decisions regarding a patient's diagnosis and treatment are based on laboratory test results.

Mission

The mission of ASCLS-ND is to promote the profession of clinical/medical laboratory science and provide beneficial services to those practitioners. To enable its members to provide quality services for all consumers, the society is committed to the continuous quest for excellence in all its activities, through...
